### DETAILED ACTION

1. This is the first Office Action on the merits of Application No. 10/666,082 filed on 9/18/03. Claims 1-9 are currently pending.

#### *Election/Restrictions*

2. Applicant's election without traverse of the invention of group 1, claims 1-3 and 6-9 in the reply filed on 01/13/05 is acknowledged.
3. Claims 4 and 5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 01/13/05.

#### *Specification*

4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

5. The abstract of the disclosure is objected to because of exceeding 150 words in length.

Correction is required. See MPEP § 608.01(b).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-3 and 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ito et al. (US 6,470,770) in view of Kobayashi et al. (US 6,857,494).

Ito et al show a power transmission apparatus having all the features recited in claims 1-3 and 6-9, including an engine 4, a cylinder block 13, a starting clutch 33, a crankshaft 5, a hydrostatic continuously variable transmission 40 having hydraulic pump 42 and hydraulic motor 44, a speed change driving member 64 for moving a speed changing driving shaft 65.

Ito et al show the starting clutch be a centrifugal clutch, not a torque converter.

Kobayashi et al show a power transmission apparatus having a starting clutch 8 be a torque converter.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the apparatus of Ito et al by replacing the centrifugal clutch by the torque converter in view of Kobayashi et al so that when the engine speed is rapidly decreased from the high-speed side on account of the characteristics of the torque converter, the rotation of output side of the torque converter can be maintained at a high speed, thereby restraining tight-corner braking phenomenon during the condition (col. 18, lines 12-19).

***Cited Prior Art***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Ito et al.'413, Doyle'691, and Ishino'473 which each shows a power transmission apparatus including an engine, a starting clutch, a CVT having a hydraulic pump and a hydraulic motor.

***Communication***

9. Submission of your response by facsimile transmission is encouraged. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9326 for regular communications and (703) 872-9327 for After Final communications. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence not permitted by facsimile transmission, see M.P.E.P. 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check should not be submitting by facsimile transmission separately from the check. Responses submitted by facsimile transmission should include a Certificate of Transmission (M.P.E.P. 512). The following is an example of the format the certification might take:

I hereby certify that this correspondence is being facsimile transmitted to  
the Patent and Trademark Office on \_\_\_\_\_

(Date)

Typed or printed name of person signing this certificate:

(Signature)

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and M.P.E.P. 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the

Art Unit: 3681

processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Examiner Ho whose telephone number is (703) 305-0738 (or 571-272-7091 after April 2005). The examiner can normally be reached on Monday-Friday from 7:30 A.M. to 5:00 P.M. Eastern Standard Time. If attempts to reach the examiner by phone are unsuccessful, the examiner's supervisor, Mr. Charles Marmor, can be reached at (703) 308-0830 (or 571-272-7095 after April 2005).
